WEB DESIGNING BY USING PHP

A Skill Development Program **"Web Designing by using PHP"** course for student was introduced. This course was funded by U.G.C. College with Potential Excellence scheme.

It was inaugurated on 9th November 2017 by Dr. S. G. Chapke, Principal of our college in presence of Shri. V. M. Thakre, HOD of Computer Science Department SGBAU. Dr. T. G. Mirge introduced the course and mentioned the importance of course to the students, and this course started on 9th Nov, 2017 and ended on 28th Feb, 2018. Total 105 students were admitted in this course, where 3 batches of 35 students each were made. The faculties of the college were actively engaged in activities such as syllabus design, preparation of study material and designing of this new course. These have immensely boosted the self-confidence and morale of the students to face the competitive world. This course was divided into three main sessions.

In First Session Prof. Mahesh Baheti delivered lecture on Open Source Softwares, Website and internet technologies, HTML Basics, HTML Tables, Forms, CSS, Dreamweaver and Uploading and downloading the files on server.

The second session was conducted by Prof. Swati Tiwari on Client side scripting language "JAVASCRIPT", uses of JavaScript, programming in JavaScript, implementation of JavaScript etc.

Final session was taken by Prof. Bhupendra Jogi on server side language PHP which includes basic as well as Objected Oriented Programming in PHP with MYSQL as Database technology.

Dr. T. G. Mirge coordinator of this course was actively involved with student and maintained the space of the course.

CSS Syllabus

Module 1: CSS-Introduction

In this module CSS is used to style and lay out web pages — for example, to alter the font, colour, size and spacing of your content, split it into multiple columns, or add animations and other decorative features. This module gets you started on the path to css.

- Benefits of CSS
- CSS Versions History
- CSS Syntax
- External Style Sheet using <link>
- Multiple Style Sheets
- Value Lengths and Percentages

Module 2: CSS-Syntax

In this module, the basic goal of the Cascading Stylesheet (CSS) language is to allow a browser engine to paint elements of the page with specific features, like colors, positioning, or decorations. The CSS syntax reflects this goal and its basic building blocks are

- CSS Syntax
- single Style Sheets
- Multiple Style Sheets
- Value Lengths and Percentages

Module 3: CSS-Selectors

In this module, CSS selectors define the elements to which a set of CSS rules apply. In this module, you will find how many selectors are there how to use it

- ID Selectors
- Class Selectors
- Grouping Selectors
- Universal Selector
- Descendant / Child Selectors
- Attribute Selectors

Module 4: CSS-Color Background Cursor

In this module, CSS Backgrounds and Borders is a module of CSS that lets you style elements backgrounds and borders. Backgrounds can be filled with a color or image, clipped or resized, and otherwise modified. Borders can be decorated with lines or images, and made square or rounded.

- ✤ background-image
- ✤ background-repeat
- background-position
- CSS Cursor

Module 5: CSS-Text Fonts

In this module, CSS Fonts that defines font-related properties and how font resources are loaded. It lets you define the style of a font, such as its family, size and weight, line height, and the glyph variants to use when multiple are available for a single character
